DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7 and 14-21, drawn to a vertical-cavity surface-emitting laser classified in class 372, subclass 96.
 - II. Claims 8-13 and 22-31, drawn to a method for making a vertical-cavity surface-emitting laser, classified in class 438, subclass 22.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case, unpatentabilities of the group I invention would not necessarily imply unpatentability of the group II, since the device of the group I invention could be made by other and materially different processes from those of the group II, for example, the method of making a distributed Brag reflector (DBR) as recited in claim 8 of group II invention could be used to make a product having different material layers (semiconductor material layers and a sacrificial material layers) arranged alternately, wherein the device recited in claim 1 of group I invention having layers of only one first material.

Art Unit: 2828

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, the fields of search are not co-extensive. Therefore, separate examination would be required and restriction for examination purposes as indicated is proper.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hung Vy whose telephone number is (703) 605-0759.
